DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 60-74 and 106, drawn to obtaining account holder verification or automatically verifying transaction without obtaining verification from said account holder, classified in class 705, subclass 26.
 - II. Claims 75-105, 107-110 and 112-113, drawn to instruction from account holder to enable or disable the verification transaction approval request , classified in class 705, subclass 26.
2. Claim 111 depends from cancelled claim 1 and therefore will not be considered. Correction is required.
3. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as obtaining account holder verification or automatically verifying transaction request. Invention II has a separate utility such as disabling any notification to said account holder. See MPEP § 806.05(d).

Art Unit: 3622

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Since the examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
